

Zen Carriere Multimedia Midterm Roadmap

Gallery Plan:

For the portfolio gallery I plan on having all of the pieces on the page but if the user clicks on a piece's title or image then a lightbox with the image opens with arrows to go through the pieces that way.

Data retrieval Plan:

I plan on fetching data from two data files. One for the index page and one for the Portfolio page. Loading each in and reporting that they've been loaded in through the console. For now I don't know how to load in images so I'm waiting to place the data until I can do it all at once.
